

RP04 Short Range Reader (30cm)

RFID readers are high performance proximity readers featuring long range and small dimensions. The readers run from any voltage from 5 to 12.5 VDC and feature high read range at as low as 5 volts making it ideally suited to a wide variety of applications, particularly access control. The same basic unit can be configured to output most of the common interface formats, including Wiegand, Magstripe, Clock/ Data and RS-232 serial ASCII output, making it easy to upgrade existing installations.

SPECIFICATIONS

Power Requirements

5 ~ 12.5 V DC regulated, linear

Interfaces

Wiegand, MSR ABA Track2 or RS232

Read Range

Up to 20 cm at 5V with ISO card;
up to 30 cm at 12.5V

Frequency

125KHz, ASK

Format

64 bits, Manchester coding
Transponder Read only

Dimensions

104 x 63 x 20 mm

Temperature Range Readers: -25 ~ 65 °C

FEATURES

- Low cost
- Long read range
- Small outline
- Wide voltage range
- Potted for environmental protection
- Externally programmable interface
- Weather resistant
